

# Xstrata Process Support

Independent Consulting and Testwork Services.

**Xstrata Process Support (XPS)** is an expert group based in Sudbury (Ontario) Canada and at various operating sites around the world. We are available to provide **quality technical expertise for orebody characterisation, operational support, growth initiatives, and project development** in the following commodity areas:

- Nickel
- Copper
- Zinc
- Gold
- PGMs
- Industrial Minerals

We have available a diverse mix of disciplinary expertise, plant operating skills, and knowledge of milling and metallurgical operations. Accordingly XPS operates four business groups:

- **Process Mineralogy** – mineral processing, mineralogy, sampling and applied statistics.
- **Extractive Metallurgy** – hydrometallurgical and pyrometallurgical testing, process modeling, and on-site support.
- **Process Control** – process control and automation technologies, and engineering solutions.
- **Materials Technology** – materials engineering for the selection and testing of materials of construction, failure analysis and equipment monitoring.

Our method and approach has been proven to add value and reduce risk.
